Machine to Machine SIM Cards

- Robust, tougher-than-normal SIM cards
- Global open roaming
- Over 150 countries covered as standard

IMO M2M SIMS Overview

IMO M2M SIM cards offer the widest global reach, and the most flexible pricing plans for your machines to communicate with your infrastructure.

Our unique SIM cards are able to roam across most of the planet, using a single and highly competitive price plan. The IMO SIM card does not hold a preference to the network it attaches to, always preferring to connect to the strongest signal available. This will give you complete peace of mind, knowing that where there is a signal, your device will always connect.

Built To Last

IMO SIM cards are built to last, using tougher plastics than ordinary SIM cards, and will withstand conditions more extreme than standard SIM cards.

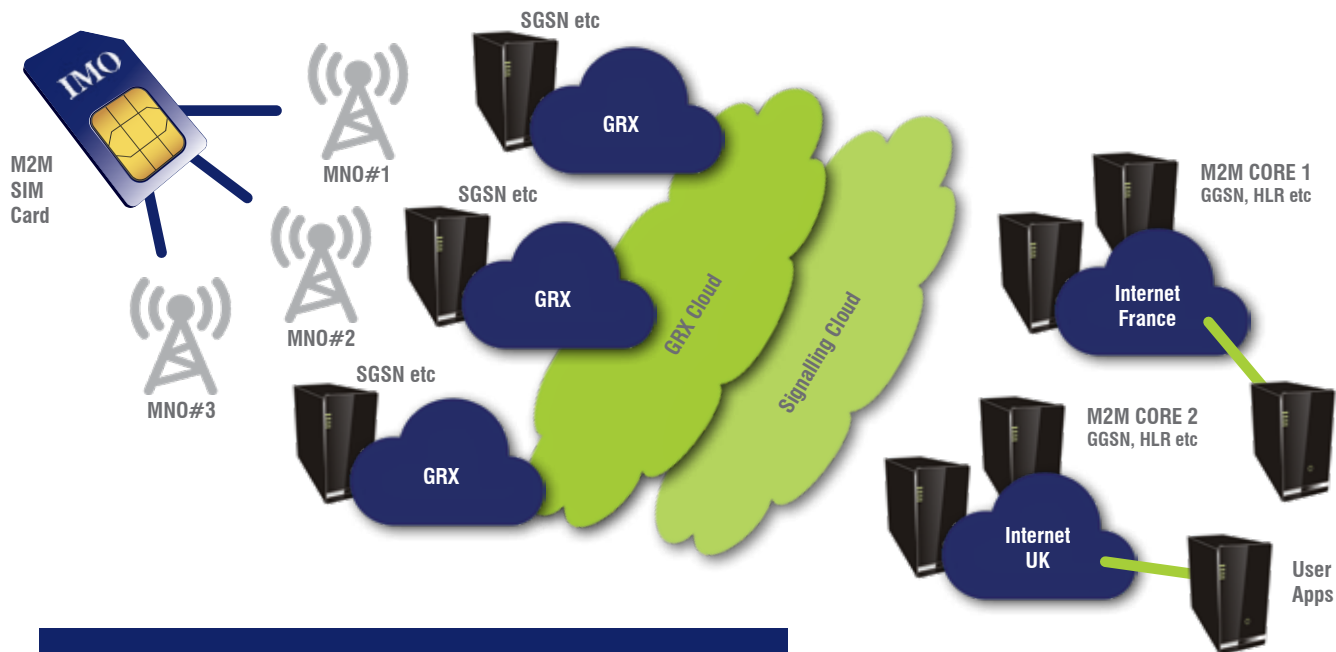

Global Coverage

Over 150 countries are covered in our standard "Area 1" pricing, on top of this, we also provide a secondary tier "Area 2" pricing for specific requirements. Examples of countries covered in "Area 1":-

- United Kingdom
 - France
 - Australia
 - Germany
 - Spain
 - United States of America
 - Italy
 - South Africa
 - Russian Federation
 - China
- + 150 more

Unparalleled Control

Additional to supplying robust SIM cards with extensive global coverage, using IMOGateway - our fully integrated and state-of-the-art portal, you are able to see up to the minute data usage across your entire SIM estate, and increase or reduce your data usage limits as required. IMO offer a fully customisable SIM management area, giving you unprecedented and unparalleled control.

Global Open Roaming Multi-Network SIMs which always connect to the strongest signal available

Data Airtime Plans

All our data plans are highly competitive, to enable ease of use and deployment of IMO SIMs. All IMO SIMs are charged quarterly in advance, with no minimum term. Note: Usage can be managed in the IMOGateway.
